HOMEWORK POLICY
Advanced Genetics (Bio 5491)

The following policy has been implemented for homework submissions. Please read carefully. If you have questions, please contact the course director: Nancy Saccone (nlims@wustl.edu).

POLICY

(1) Homework is always due, in its entirety, on the date indicated on our class website. If the instructor does not indicate a due date, please check with the MTEs or the Course Director.

(2) The general policy for late submissions is to subtract 10% of the HW value for each day late. Delays should be discussed with the MTEs, preferably prior to the submission date. In the event of an emergency, talk with the MTEs and the course director – we will accommodate justified emergencies.

(3) We encourage you to turn in as much of the assignment as you can on the due date, for maximum credit.

(4) Discussing HW problems together is allowed. However each student must write up their own solutions individually.

(5) Additional notes for Spring 2023: With the advent of AI content-generating tools such as ChatGPT, we are working to determine a policy that continues to support our course’s learning objectives while allowing students to benefit appropriately from these tools. At this time, at a minimum, if a student chooses to use an AI content-generating tool to assist with their learning while working on an assignment, we require that they cite that use, evaluate the quality of the response given by the tool, and use their own words to describe the process and outcome of that educational use of the tool.

Good luck!
